

INTRODUCING THE SKYCADDIE LINX GT GAMETRACKING EDITION

Golf's First 3-in-1 System

At its core, the LINX GT is a standalone GPS watch that features SkyGolf's best-in-class TrueGround® Course Maps to provide golfers with distances they know they can trust. But it is so much more than that! The LINX GT is the first rangefinder that includes a built-in shot tracking system so golfers can track the club, location and distance of each shot. And the best part is it connects with the SkyCaddie Mobile app so you can view the results overlaid on vivid HD course maps in real-time!

- **Use the SkyCaddie LINX GT alone as a simple rangefinder** or combine it with the SkyCaddie Mobile GPS app and SkyGolf SmartTags for a complete distance and shot tracking system!
- **SkyGolf® GameTracker Technology** makes shot tracking easy:
 - Attach SkyGolf SmartTags to each club in your bag
 - Tap a club to the LINX GT watch before taking your shot
 - See the club, location and distance of each shot overlaid on SkyCaddie Mobile's Interactive HoleVue™ screen!
- **Real-time, Wireless Synchronization** between the LINX GT and SkyCaddie Mobile via Bluetooth® Smart technology provides:
 - Quick distances on your watch
 - An expanded view in vivid HD on your smartphone
 - Sharing of your live round with your golf instructor, friends or family

Know the distance to critical targets ahead, such as water, bunkers, carries and more!

Know how far you hit each club in your bag, overlaid on a vivid HD graphic of the hole

Get the distance to any point on the green by moving the LINX GT's IntelliGreen® crosshairs

- **Preloaded with 35,000 TrueGround® Course Maps**, ready-to-play, WORLDWIDE.
- **Accurate distances** to fairway and green targets that automatically update as you move; distances to bunkers, carries, water, creeks, end of fairway and many more. Up to 40 targets per hole.
- **IntelliGreen® technology** displays the true shape of the green from your angle of approach. Get critical green distances — front, back and any distance in between. Move the IntelliGreen cursor to any point on the green, such as the pin or a safe landing zone, to sink more putts!
- **Digital scorecard** and stat tracking records your progress during the round and can be uploaded to the SkyGolf 360 Cloud for post-round analysis.
- **Intelligent automation**, such as Auto-Course Recognition and Auto-Hole Advance, allows for a virtually hands-free experience.
- **Smartphone notifications** show in-bound call with caller ID, voicemail notification, text message and email alerts
- **AutoSwing detection** knows when and where you swing so you never miss a shot.
- **The LINX GT's powerful TruePoint® GPS engine** replaces your smartphone's location services to improve accuracy up to 300% over all other smartphone golf GPS apps, while conserving your phone's battery!
- **Multi-sport odometer** tracks your distance, pace, and speed — whether you are golfing, walking, running or cycling.
- **Set a fitness goal** and the LINX GT will track your number of steps, calories burned and distance walked against your goal.

Package Includes a 12-Month Prepaid Card!
